Manuted Queven, delegate caliplanes to Congress, public ted at

ture of which is hard to predict; but it is safe to assert that they will he such as to make it a very expetisive task for the American governserious menace to the success of American enterprises."

The above is the veiled threat of Manuel Onezon contained in a signed statement published in the Knicker bocker Press under date of October 4. It was published just about a month ago and almost contemporane ous with his arrival and his proposal to the Americans of the islands to cooperate with him in securing independence for the Archipelago. The excerpt was contained in a long statement authorized by the resident commissioner from which we quote the following excerpts:

"It is time for those who look upon ! the Philippine problem as a business enterprise," Mr. Quezon declares, "to come out and say so frequently when they are advocating the retention of the islands, instead of covering their real purpose with the arguments, insulting to the national pride of the Filipino people, that the United States is in the Philippines not for the territorial expansion, not for commercial gain, but to supply the islands with i benevolent and wise government, that the Filipinos are incapable of es tablishing and maintaining from

"While I admit that some of those Americans who are opposed to cutting loose from the islands just now or in the near inture have taken this position because they have been led; to believe that the control of the United States of the Philippines is necessary in consequence of the lack of preparation of the Filipino people to manage their own affairs, there has never been any doubt in the minds of my people that the real motive of those who have been preaching their incapability for selfgovernment is to keep the islands in their present status for the material profit that they are getting or expect to get from them.

"Now, as to the question that the Philippines is the 'key to the success of the United States in the Far East. it can be asserted at the very outset that those who believe that the present relations between the Philippines and the United States afford such a key are utterly mistaken. The Filipino people are not satisfied, nor ever will be satisfied with their present form of government. The help they are lending this government and their good relations with the Americans in the islands are due exclusively to their belief that within a very short time the Philippines will be free from the control of the United States in that Filipinos will be allowed to set up by themselves a gov ernment of their own."

### NO CARNEGIE PENSION FOR COL. ROOSEVELT

NEW YORK, November 26.-Theodore Roosevelt takes no interest in Carnegie pensions for retired Presidents. He said so today, at the same time declaring for legislation for the deserving aged and infirm that will provide for widows and orphans.

The Colonel came into town to see a large number of callers, answer considerable cornespondence, dictate some editorials and attend to other busi-

"My interest is not in pensions for ex-Presidents," be said, "but in pensions for the small man who floes not have a chance to save and who, when he becomes superannuated, faces the direct poverty.

"I think the smaller government emplove who gives years of faithful service for a small emolument is deserving of a pension on his retire-

"More than that, I feel that in this country we have to work out some system of insurance pensions which will relieve the ordinary workingman who has been honest and industrious of the haunting dread of extreme

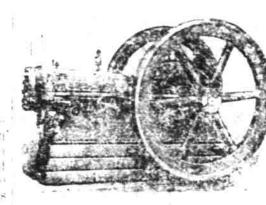

"Even more, I believe that the wider left with dependent children should receive from the state enough t chring up those children "And it she has been deserted by

her husband, he should be promptly captured and set to work and by carnings turned over to his wife a
